

# 2021 Imagine That Middle School Art Contest

## Entry Guidelines:

When: Entries must be submitted no later than **October 26, 2021**.

Who: 6th through 8th grade students in Flint Energies' service area

What: Think about your favorite outdoor activity. Create a poster educating others on how to stay safe around electricity while participating in it.

A few important electrical safety tips for children:

- Watch out for overhead power lines and electrical equipment. Never climb on or play near them.
- Never climb trees near power lines. Even if the power lines aren't touching the tree, they could touch when more weight is added to the branch.
- Fly kites and model airplanes in large open areas like a park or a field. Stay far away from power lines. If a kite gets stuck in a tree that's near power lines, don't climb up to get it. Contact Flint Energies for assistance.
- Never fly a kite on a cloudy day when a thunderstorm may be approaching.
- Never climb a utility pole or tower. The electricity carried through this equipment is extremely high voltage and could kill you.
- Never go into an electric substation for any reason. Electric substations contain high-voltage equipment, which can kill you. Never rescue a pet or retrieve a ball or toy that goes inside. Call Flint Energies instead.
- Water and electricity are a dangerous combination and should never be used near each other.
