JOB CLASSIFICATION JOB CLASSIFICATION JOB CLASSIFICATION JUDIE JOB; EXEMPT SUPERVISOR LAST DATE August 2025 August 2025 JOB SUMMARY JOB SUMMARY Supports developments of RUS Long Range and Four-Year Planning Studies; solves voltage and capacity problems mee guidelines; designs the system for a 95% power factor; reviews substation and line equipment for adequate capacity to har fault current, and voltage. Works in the office and travels to substations and members alse as required to operate and maint electrical system. Performs sectionalizing studies, system protection, SCADA, Distribution Automation, and other bytacid electrical system. Performs sectionalizing studies, system protection and protection. SCADA, Distribution Automation, and other bytacid electrical system. Performs sectionalizing studies, system protection and protessing and studies. Performent and section cultify EDUCATION / TRAINING EDUCATION / TRAINING EDUCATION / TRAINING Bachelor of Science in Engineering or Engineering Technology from ABET accredited educational institution. Performent Bachelor of Science in Engineering or Engineering Engineering experience with system protection and coordination Experience with system		INTERNAL/EXTERNAL POSTING (Employees and Individuals meeting the following requirements are eligible to apply.)	
JUSE CLASSIFICATION Manager of Engineering LAST DATE REVIEWED August 2025 Supports developments of RUS Long Range and Four-Year Planning Studies; solves voltage and capacity problems meg guidelines; designs the system for a 95% power flactor; reviews substation and fine equipment for adequate capacity to ha faut current, and voltage. Works in the office and travels to substations and manners also as required electrical system. Performs sectionalizing studies, system protection, SCADA, Distribution Automation, and other typical engineering activatives. Supports the activities of the Manager of Engineering as detected. Provides technical support to Engineering and surfaces. Supports the activatives of the Manager of Engineering as detected. Provides technical support to Engineering and surfaces. Supports the activation of the manager of Engineering as detected. Provides technical support to Engineering and surfaces. Supports the activation of the manager of Engineering as detected. Certification and Professional Licensure attainability Experience with system protection and coordination Experience with system protection and coordination Experience with system protection and coordination Experience with system modeling including ampacity, voltage drop and impedance calculations using commercial analysis software. Experience with relay and apparatus testing Experience with relay and apparatus testing Experience with Field Engineering including structural analysis, pole top framing, transformer sizing and area light Experience with Field Engineering including structural analysis, pole top framing, transformer sizing and area light Experience with histribution automation design and programming including relay logic. Experience with distribution automation design and programming including relay logic. Experience with distribution automation design and programming including relay logic. Experience with distribution automation design and programming including relay logic. Experience with distribution automation design and programming including relay logic. Experience with distribution automation design and programming including relay logic. Experience with distribution automation and standards Required: Proficiency with Microsoft Office Software Ability to become proficient using various database applications to create, maintain, query, and generate reports o data. Ability to betain and maintain Integrated Transmission Systems (I.T.S.) switching certification within two (2) years of the properties of the proficient using various database applications to create, maintain, query, and generate reports of data. Ability to botain and maintain Integrated Transmission Systems (I.T.S.) switching certification within two (2) years of the proficient within the withing the subject of the proficient using various database applications to create, maintain, query, and generate reports of data.	ON / TRAINING Req		
Experience with distribution automation design and programming including relay logic. Experience with cybersecurity implementation and standards Required: Proficiency with Microsoft Office Software Ability to become proficient using various database applications to create, maintain, query, and generate reports of data. Ability to obtain and maintain Integrated Transmission Systems (I.T.S.) switching certification within two (2) years of employment. Positive Attitude and willingness to be a team player in support of exceptional internal and external customer serving Willingness to learn and use new skills and procedures. Self-starter with ability to make independent decisions. Ability to multi-task and work with multi-functional applications Preferred: Knowledge of RUS standards for construction Working knowledge of National Electric Safety Code and National Electric Code Working knowledge of Attional Electric Safety Code and National Electric Code Working knowledge of engineering analysis software such as Milsoft, LightTable, SEL QuickSet and SEL RTAC		 Bachelor of Science in Engineering or Engineering Technology from ABET accredited educational institution. Ferred: Bachelor of Science in Electrical Engineering Engineering experience with an electric utility E.I.T. Certification and Professional Licensure attainability Experience with system protection and coordination Experience with system modeling including ampacity, voltage drop and impedance calculations using commercial utility analysis software. Experience with substation design and construction Experience with relay and apparatus testing Experience with SCADA design, programming, and testing Experience with Field Engineering including structural analysis, pole top framing, transformer sizing and area light design. Experience with network design and implementation 	
INTERPERSONAL SKILLS Proficiency with Microsoft Office Software Ability to become proficient using various database applications to create, maintain, query, and generate reports of data. Ability to obtain and maintain Integrated Transmission Systems (I.T.S.) switching certification within two (2) years of employment. Positive Attitude and willingness to be a team player in support of exceptional internal and external customer serving Willingness to learn and use new skills and procedures. Self-starter with ability to make independent decisions. Ability to multi-task and work with multi-functional applications Preferred: Knowledge of RUS standards for construction Working knowledge of National Electric Safety Code and National Electric Code Working knowledge of engineering analysis software such as Milsoft, LightTable, SEL QuickSet and SEL RTAC Experience with Schweitzer Engineering Laboratories (SEL) equipment. Working hours - Typically 4 – 10 Hour days with one hour for lunch. (Specific schedule to change to meet the need company). Must be able to serve on-call, accept after-hours calls by phone and work after-hours in emergency situations OTHER Must have and maintain a valid driver's license with a verifiable safe driving record (MVR required) Must be willing to accept communications of company and security updates notifications by phone. Must live within 60 minutes of Flint's Service Center (32.585878, -83.720310) APPLYING FOR JOB Job Change Applications are available from Human Resources or the intranet and MUST be submitted via (hr@flintemc.com). Emailed application must be received by 5:00 p.m., Friday, August 8, 2025. Qualified external applications may print an application from our website, www.flintenergies.com, or pick up an application from our offices at 98 Carl Vinson Parkway, Warner Robins, GA or 3 South Macon Street, Reyno The deadline for external applications is 5:00 p.m., Wednesday, August 20, 2025. FLINT EMC IS AN EOE/AA: MINORITIES / FEMALES / VETERANS / DISABLED DRUG FREE / SMOKE FREE WORKPLACE

PHYSICAL DEMANDS FOR ESSENTIAL FUNCTIONS ELECTRICAL ENGINEER (POWER SYSTEMS)

ALERTNESS &	Must be able to consider the consideration of the Deplette size and receive information and continue
	Must be able to concentrate on several things at one time. Be alert to give and receive information and analyze
CONCENTRATION	data to make important decisions.
ABILITY TO DEAL WITH STRESS	Must be able to work under pressure, handle tense situations, resolve complaints, and control anger and
	attitude. Contributes to team spirit and enthusiasm.
VISION	
	Far Visual Acuity - As necessary to drive.
	Near Visual Acuity - Must be able to see computer screen, keyboard, and read all types of paperwork, including
	small figures. Necessary for operating necessary office equipment. Peripheral Vision - As necessary for driving.
	Color Vision - As necessary for recognizing appropriate forms and driving.
	3 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4
	Depth Perception - As necessary for driving.
	Night Vision - Same as above
HEARING	(Normal Tones) Hears and comprehends spoken conversation over telephone and in person.
SPEECH	Speaks loudly and clearly enough to be accurately understood. Voice must be pleasant, tactful, and
SPEECH	professional. Must be able to make effective presentations for all age groups.
SITTING / STANDING	Sits a maximum of 2 hours at a time, up to a total of 10 hours per day. (Whatever amount required for after-
SITTING / STANDING	
	hours meetings.) Can stand up as needed. Normally stands less than 1 hour per day. Occasionally stands for
WORKER MORILIEW (WALKING	making presentations.
WORKER MOBILITY / WALKING	Can change positions at will. Minimal walking around office and job sites.
LIFTING / CARRYING	Occasionally lifts files, small tools, research books, and printouts. Seldom anything over 25 pounds.
	Occasionally lifts overhead projector. Required to open/close desk drawers and file cabinets.
BENDING	Bends from neck for talking on telephone. Bends from waist to retrieve documents in files and desk drawers.
	Twisting Intermittent.
REACHING / HANDLING	Wrist, hand, and arm frequently used for operating PC, calculator, writing, performing miscellaneous general
	office work, and driving automobile.
TWISTING / CLIMBING /	Can be avoided somewhat by taking step in direction of the work. Occasionally climbs on and off trucks and
CRAWLING	equipment when on job site with crews.
ENVIRONMENTAL FACTORS	Job is located indoors in a heated/air-conditioned building. No noise, light, fumes, or dust hazards present.
	May occasionally visit outdoor business facilities and job sites.
MACHINES / TOOLS/	Hand tools, voltmeter, amp meter, computer, copier, fax, stapler, and other miscellaneous office equipment.
EQUIPMENT	, , , , , , , , , ,
SAFETY EQUIPMENT / SAFETY	Hard hat, rubber gloves, overshoes, safety glasses, work gloves, sleeves. Mayday, CPR, First Aid and
LOSS CONTROL PROCEDURES	Defensive Driving. Follows prescribed safety rules.
DRUG TEST / PHYSICAL EXAM	Drug test required for pre-employment and random thereafter. Employment entrance physical exam required.
DROG ILGI / FIII GICAL EXAM	progress required for pre-employment and random thereafter. Employment entrance physical examinequired.

Requirements are subject to possible modification to reasonably accommodate individuals with disabilities provided it does not pose a direct threat or significant risk to the health and safety of themselves or other employees.
